

TOBIAS ATTRILL

BA(HONS) ARCHITECTURE

-About-

Defining myself as ambitious and driven, I continually look to be of high value for any team that I join; whether that be in the professional working environment or in an educational setting. Taking initiative, I'm willing to lead teams through adversity in order to successfully meet objectives and expectations. A varied and diverse working background has helped develop and nurture my skills that are transferable between a wide variety of working environments and professional sectors, primarily all elements of the Architecture industry which I immersed myself in fully, becoming a RIBA Student secretary for Plymouth branch.

-Skills & Qualifications-

- Proficient in Adobe Creative Suite, specialising in Photoshop.
- Strong problem solving skills, both architecturally and in the working environment.
- Skilled in Revit and Enscape to create detailed renders and digital models.
- Strong leadership skills to lead teams to completing objectives and tasks.
- Strong decision making skills, especially in fast paced environments, linked to previous work experience.
- Food and hygiene safety (Level 2) educated.
- Experience in private and public catering, as well as hospitality for private functions, serving customers with courtesy and providing for a range of dietary and allergen needs.
- Understanding of AutoCAD and Keyscape CAD design, creating detailed and accurate maps and surveys.

-ADDITIONAL INFORMATION-

- RIBA Plymouth Student secretary.
- Plymouth University Architecture Society lecture secretary.

-Education-

ALL HALLOWS 6TH FORM COLLEGE

A-Levels

History, Theory and Critical Context- A

- toby.attrill@gmail.com

-Experience-

CINNAMON GARDEN BAR AND RESTURANT

2021-2023

Beginning as a waiter, I gained valuable experience in the service industry, fulfilling my requirement to create a pleasant experience for customers. In the summer of 2022, I moved into the kitchen, leading the restaurant through busy services, linking the kitchen to front of house through organisation, communication and initiative. This position in the restaurant industry has inspired me to chase and invest myself in other hospitality and catering environments- with an obsession to better my skills in this sector as I find it valuable to my future endeavors in any sector or professional environment.

AMADEUS (NEC GROUP) AT FARNBOROUGH INTERNATIONAL

2023-

Working in a variety of roles, including in hospitality and retail, this job provided me with invaluable skills in intrapersonal relations, having to work with a large scale and diverse clientele for national events. In addition to this, training in food hygiene and safety gives me a grounded understanding for future employment in similar sectors. Working on large scale events, such as the British Motor show, I was able to successfully manage large scale demands, through effective communication to other sections of a large team, such as kitchen staff as well as the restocking staff. Additionally, working in a private catering setting with a diverse range of allergen and dietary needs gave me a valuable understanding of developing a relationship of understanding with a customer, as well as making sure that we are able to safely and successfully deal with their dietary requirements.

KEEN CONSULTANTS LTD.

2023-

Closer to my architectural background, this arboricultural consultancy deals with a large range of clients on a variety of projects. Being trusted on valuable varied tasks such as tree scheduling, tree constraint plans and TPO checks, I aided in the firms ability to fulfil the clients demands to the highest level. Working alongside architects, urban planners and local authorities, it gave me a deeper and more considered understanding of the design process for urban projects. Developing new skills such as learning a new CAD software (AutoCAD and Keyscape LT), it makes me an even more valuable team member in this field, with an unrivalled insight into the environmental constraints of urban planning projects, as well as the long term maintenance of the environmental aspects of urban design and planning.
